OBJECTS OF DESIRE 10.09

This month: WIRED dives in deep - the best in marine cameras, spearguns, bots and watches. PLUS: retro pro-camera; bamboo bike

Remote-control underwater robot

Cetrax / Global Marine
Predator ROV

Need to inspect your superyacht's screws? Or photograph the fish below? The Predator remotely operated vehicle (ROV) works at a depth of 300m. It's attached to the controller with a tether which carries power and command signals. Cameras on its hull transmit shots to a screen above water. You can fit arms and low-light cams. £65,000
